PROFESSIONAL SUMMARY

Computer Science Engineering student at Chandigarh University with hands-on experience in full-stack web development using the MERN stack. Proficient in Java, Spring Boot concepts, React.js, SQL, and OOP principles. Passionate about building scalable, high-performance web applications and eager to contribute in an Agile/SCRUM environment.

TECHNICAL SKILLS

Languages:	Java, C++, Python, JavaScript (ES6+)
Frontend:	React.js, HTML5, CSS3, AngularJS (familiar)
Backend:	Spring Boot (familiar), Node.js, Express.js, REST APIs
Database:	MySQL, MongoDB, Spring Data JPA / Hibernate (familiar)
Tools:	VSCode, Git/GitHub, Google Colab, Maven
Concepts:	OOP, MVC Architecture, Agile/SCRUM, Database Normalization
Soft Skills:	Problem-Solving, Team Collaboration, Communication, Time Management

EDUCATION

Bachelor of Engineering in Computer Science | Chandigarh University | Aug 2023 – Present | CGPA: 7.34

Intermediate (CBSE) | Heritage International School | 74%

Matriculation (ICSE) | Sacred Heart School, Chianki | 76.4%

PROJECTS

E-Commerce Web Application | MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Built a full-stack e-commerce platform featuring user authentication (JWT), product catalog management, cart functionality, and a seamless checkout flow.
- Implemented React.js component-based UI for a fast, responsive, and interactive user experience — directly aligned with the role's frontend stack.
- Designed RESTful APIs with Express.js and managed product/user data via MongoDB with proper database normalization principles.

Rainfall Prediction System | Python, TensorFlow, Google Colab

- Designed a machine learning model to predict rainfall patterns from historical weather data using TensorFlow.
- Demonstrated strong problem-solving and analytical thinking through data preprocessing and model evaluation.

Smart City Solution | Research Paper | IoT Framework

- Proposed an IoT-based smart city framework to optimize traffic, energy consumption, and public safety — documented architecture, implementation approach, and expected outcomes.

CERTIFICATIONS

- React Native – Building cross-platform mobile apps with React & JavaScript
- Cloud Computing – Cloud infrastructure, deployment models, scalable computing solutions
- Developing Internet of Things – Smart devices, IoT ecosystems, real-time data processing
- Introduction to Databases – Relational databases, SQL, normalization, ER diagrams, transactions
